ABSTRACT

Lectotypes are designated for *Psiloptera variabilis* Mannerheim, *Buprestis mannerheimii* Mannerheim and *Agrilus flavolineatus* Mannerheim from the Universitetets Zoologiska Museum, Helsingfors, Finland.

After the lectotypes of western hemisphere Buprestidae from the Mannerheim collection (Nelson 1976) were returned to the Universitetets Zoologiska Museum, Helsingfors, Finland, Dr. H. Silfverberg sent 3 more and indicated that they complete the new world types in that collection. A lectotype label has been attached to each. The hash mark (/) separates data on individual labels with my notations in parentheses. Abbreviations (h) = handwritten and (p) = printed.

Psiloptera variabilis Mannerheim, 1837:47. 3 labels: male sign (h)/Eschsch. (p)/Rio de la Plata (h)/.

Buprestis mannerheimii Mannerheim, 1837:66. 3 labels: male sign (h)/Jaeger. (p)/ St. Domingo (h)/. (Left metatibia missing. This is the specimen in the original description referred to as var. b).

Agrilus flavolineatus Mannerheim, 1837:110. 2 labels: LeConte (h)/ Amer. bor. (h)/. (Lectotype is a female).
